ANSYS APDL

**Duration:** (1 Day)

Analysts responsible for customizing application of the ANSYS Software should attend this course. The seminar focuses on improving the efficiency of performing ANSYS analyses.

This course instructs users how to create custom ANSYS commands and sub-routines through macro programming using the ANSYS Parametric Design Language (APDL) and customize content and organization of ANSYS GUI components.

**APDL course topics:**

- Getting Started with APDL
- Working with Macros
- Scalar parameters
- Interfacing with the User.
- Program Flow in APDL
- Arrays / Tables / Vector Operations.
- Information retrieval from APDL
- Importing and exporting data to and from APDL

**Pre-Requisites:**

Attendees must have good experience in using ANSYS Classic GUI.

**Note:**

- A hard copy of the course material will be given to the attendees.
- Attendee’s real time problems can be discussed within the time limit of the course.

**Fee:** Rs 12,000/- + Applicable Taxes
